Informatics graduate with experience in web development, system analysis, data management, and machine learning. Strong analytical mindset with the ability to translate complex requirements and problems into structured data-driven solutions. Proven ability to lead cross-functional teams and communicate effectively with stakeholders. Detail-oriented, adaptable, and committed to continuous learning, with a passion for improving information systems and delivering reliable digital outcomes that support business goals.

EDUCATION

JEMBER UNIVERSITY — **Jember, Jawa Timur**
Bachelor of Informatics, Faculty of Computer Science — **Graduated January 2026**
GPA 3.75 / 4.00 - Excellent

EXPERIENCE

COMPUTER SCIENCE FACULTY of JEMBER UNIVERSITY
Frontend Web Developer & System Analyst — **March 2024 – July 2024**

- Contributed to system analysis, feature planning, application testing, and issue resolution to ensure all functionalities perfectly aligned with overall project requirements.
- Collaborated with cross-functional teams, including UI/UX Designers, Database Developers, and Backend Developers to support integrated information system development.
- Developed responsive and user-friendly application interfaces using JavaScript and CSS3, translating functional specifications to ensure accurate visual presentation and system usability.
- Successfully delivered 'Smart Canteen', a web-based ordering system using Laravel designed to resolve unstructured physical queues at the faculty canteen. The system enabled remote ordering, order sequencing & tracking, and provided seller dashboard for menu management and sales revenue reporting.

PT. GITS INDONESIA
Fullstack Web Developer — **August 2023 – December 2023**

- Selected as Project Lead for a team of five Full-stack Web Developer trainees, leading project planning, requirement gathering, task allocation, and timeline management using Trello to ensure successful project delivery throughout the software development lifecycle (SDLC).
- Designed business workflows, database structures (ERD), and contributing to full-stack development while ensuring system integration and consistent implementation of project requirements.
- Developed a web-based Food and Beverage (F&B) ordering system using Laravel to enpower MSMEs (UMKM), featuring seamless customer purchasing flow (ordering, payment, and tracking) alongside a seller dashboard for menu management and sales revenue reporting.

RELEVANT PROJECT

PERSONAL PORTFOLIO WEBSITE
React / TypeScript / Tailwind CSS / Vite — **August 2026**

- Designed and developed a personal portfolio website to consolidate projects, achievements, certifications, and other professional information using React and TypeScript.
- Customized and refined the website's UI/UX using Tailwind CSS, focusing on responsive layouts, visual consistency, navigation, and user-friendly presentation across screen sizes.
- Implemented interactive features including bilingual navigation, project filtering, interactive project details, and a 3D interactive element using React Three Fiber and Three.js.

DATA ANALYTICS
Trade Balance Transition Analysis Project — **July 2026**

- Extracted, cleaned, and standardized 29 years of historical time-series data (1996-2024) from Statistics Indonesia (Badan Pusat Statistik) by handling true zero values, standardizing formats, and ensuring data integrity for analysis.
- Conducted Exploratory Data Analysis (EDA) and applied descriptive statistics using Microsoft Excel to identify structural trade patterns, product composition, and extreme economic anomalies across multiple decades.

- Build an analytical dashboard using Advanced Pivot Tables & charts, and documented key findings in a structured analytical report to communicate insights clearly and support data-driven interpretation.
- Authored a comprehensive analytical report identifying Indonesia's transition into a net-importer, discovering a 71% import dependency on refined fuel, and formulated data driven strategic recommendations for downstream policy improvements.

THESIS

Computer Vision Research **August 2025 – January 2026**

Performance Analysis of YOLOv8l-seg and YOLOv11m-seg for Multi-Class Coffee Fruit Maturity Instance Segmentation

- Prepared, organized, and validated 2,492 annotated images through preprocessing, data splitting, and augmentation to ensure high-quality datasets for machine learning development.
- Designed and executed a structured evaluation framework using quantitative performance and computational metrics to objectively identify classification patterns and data-related challenges.
- Developed a Flask-based application for external model validation with configurable inference parameters and real-time visualization.
- Identified the optimal model based on segmentation accuracy, computational efficiency, and deployment readiness.

BUSINESS COLLABORATION INFORMATION SYSTEM

System Analyst & Designer **April 2023 – July 2023**

- Conducted stakeholder interviews and requirements gathering, translating business needs into User Stories and Software Requirements Specifications (SRS). Modeling business workflows using BPMN to document process flow and decision points.
- Designed system behavior and interaction logic through Use Case, Activity, Sequence, State, Class, and Collaboration diagrams, complemented by usage Scenarios to guide development.
- Translated functional requirements into UI/UX mockups to support stakeholder validation before development.
- Collaborated with Project Manager, Programmer, and Tester roles to ensure alignment between requirements, design, and implementation.
- Developed a web-based business collaboration information system to support user management, advertising services, invoice generation, and secure user authentication.

ORGANIZATIONAL EXPERIENCE

COMMUNITY SERVICE PROGRAM (KKN) — Jember University

Sub-district Coordinator & Documentation Team **July 2024 – August 2024**

Coordinated communication and information flow among eight village coordinators student groups. Collaborated with university representatives, local government officials, and student groups to ensure smooth program execution and stakeholder coordination. Managed activity documentation and reporting to maintain organized project records and facilitate cross-team communication.

STUDENT CHESS ACTIVITY UNIT

Publication & Documentation Committee **2021 - 2023**

Supported event publication and information dissemination through digital content creation. Managed event documentation and activity records to support post-event reporting. Worked alongside committees to ensure smooth event execution and participant engagement.

TECHNICAL SKILLS

- **Programming:** Python, JavaScript, TypeScript, PHP, HTML5, CSS3, NodeJS
- **Framework:** Laravel, Flask, React, Tailwind CSS
- **Database:** MySQL, PostgreSQL
- **Machine Learning & Data:** TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib
- **System Analysis:** Enterprise Architect, Bizagi, Software Ideas Modeler
- **Development Tools:** Visual Studio Code, Figma, GitHub, Laragon, Docker, Trello, Google Colab
- **Office Applications:** Microsoft Excel, Microsoft Word, Microsoft PowerPoint, Microsoft Fabric

CERTIFICATIONS

DATA SCIENCE WITH MICROSOFT FABRIC, DICODING X MICROSOFT	**July 2026**
DATA ANALYST, SPECIAL SKILL	**July 2026**
FULLSTACK WEB DEVELOPER, GITS INDONESIA	**December 2023**
SOLID PRINCIPLE PROGRAMING, DICODING	**October 2023**
PYTHON PROGRAMING, PROGATE	**August 2021**
